

Welcome to the twenty-third edition of the Turolla quarterly newsletter. Even though we are well into the Summer Season, activity in the market place is still at a very high level, which is having a positive effect on Turolla. Not only are we able to handle the increasing demand, but our state-of-art factories, in both Italy and USA, are able to meet the tough demands in an effective and timely manner – this is indeed “Peak Performance”!

In this Newsletter you will find news about new people on-board, new releases to the standard program, compliance to an automotive standard, and a snap-shot from our Partner in Ireland.

Finally, as always, your valuable feedback is very much appreciated and welcomed – because your opinion matters!

So, for the next five “reading-minutes” – enjoy!

Best regards, Ulrik Krag - Manager Partner Companies Europe

New Sales Engineer

In our efforts to support the growth path Turolla is following, we are happy to welcome Mr. Fulvio Gentile as our new Sales Development Manager.

Mr. Gentile has more than 10 years of experience, most recently as Sales Manager at Interpump Group, Italy.

He holds a master's degree in Management Engineering from Reggio Emilia University in Italy as well as a Ph.D, in Engineering of Innovation.

His main area of responsibility in Turolla will be Global Key Account Management and OEM Account Management in France, Italy and Spain.

Mr. Gentile will be working from our facility in Castel San Pietro, Italy.

News from Turolla Sales

In the recently published 2017 European Price Book, you may already have noticed all the new released products within the Aluminum and the Cast Iron product range.

Compared to the 2016 version, almost 500 new releases have been added and are now included in the 2017 standard program.

News from Turolla Quality

Our Quality Management System has recently successfully passed a third-party auditing for full compliancy to the ISO / TS 16949 Standard.

ISO TS 16949: 2017

Even though aimed at the automotive industry, complying to the requirements of ISO/TS 16949 means continuous focus on preventive initiatives to reduce deviations through a controlled and lean approach.

Mr. Riccardo Carra, VP & General Manager Turolla, receiving the ISO TS 16949 statement.

The result has been well received and highlights the outcome of our persistent efforts in ensuring a strong, quality based platform in our factories in Italy and USA.

News from our Partner in Ireland

Taking pole position in the Irish Industrial Hydraulics & Mobile Hydraulics market, our Turolla Partner, Pressure Hydraulics & Controls (PHC), has just taken their footprint to a higher level by relocating to two new, larger premises in Cork and Carlow.

This move reflects their on-going, successful response to the demands of the market as well as their competent coverage of the different sectors within their markets.

In this respect they have dedicated a brand new workshop area in Cork exclusively for Turolla assemblies and stock.

With this investment, PHC anticipate that they, through their ability to supply and/or build from stock, can meet the growing demand for Turolla products in a faster and more efficient way.
