

Welcome to the twenty-fourth edition of the Turolla quarterly newsletter. In the transition from summer to autumn, we have experienced huge demand, which we have been able to accommodate, ensuring a high level of consistency and punctuality. This performance is an excellent example of the strong, competitive Turolla 2.0 platform, provided by our state-of-art factories and competent teams, in both Italy and the USA.

In this edition, you will find the latest news from our organisation, an open invitation to visit us at the upcoming Agritechnica Exhibition in Hannover, and the active participation of two of our Partners at this important event, displaying the latest news within connectivity and smart system solutions.

Finally, as always, your valuable feedback is very much appreciated and welcomed – because your opinion matters!

So, for the next five “reading-minutes” – enjoy!

Best regards, Ulrik Krag - Manager Partner Companies Europe

New Global Product Manager

An important pillar to support our growth path is competent people, which is why we are happy to welcome Miss Sara Cazzaniga as our new Global Product Manager.

Her main focus area will be ensuring the market implementation of our fast forward moving product line strategy.

Miss Sara Cazzaniga

Before joining Turolla, Miss Cazzaniga has worked within the field of product management and market support.

She also holds an Energy and Nuclear Engineering MS degree, from the Politecnico di Milano in Italy.

Miss Cazzaniga will be supporting Turolla's global presence and be working from our new facility in Castel San Pietro, Italy.

Agritechnica 2017

Coming up soon, the world's largest trade fair for agritechnical machinery, equipment and smart solutions will take place, November 12-18th in Hannover, Germany.

Like last time, we will exhibit together with Comatrol and the rest of the Danfoss Group in Hall 16 – Booth 12 (B12).

And be assured, there will be some interesting solutions to discover, together with the latest product updates and support tools.

We hope to have awoken your curiosity and welcome you to visit our booth in Hall 16 – B12.

Turolla Partners at the Agritechnica

Ensuring strong representation at this year's great Agritechnica event, two of our Partners in Germany, Sauer Bibus and Th. Niehues, will be present in Hall 16 – the same exhibition Hall as Turolla and the other Group members of Danfoss.

Sauer Bibus will be highlighting their strong competence base within mechatronics – connecting mechanical and electro-hydraulic solutions in a smart and intelligent way.

Th. Niehues will be focusing on various control situations with respect to dynamic work load scenarios.
